

HYDRAFLOW

Sustainability Recap

Hydraflow strives to continuously advance its corporate sustainability by promoting and monitoring activities focused on improving our **People** and **Planet**.

Reducing Our Impact on Landfills

Cardboard recycling is a key part of Hydraflow's waste reduction program. Hydraflow recycled over 16,000 pounds of cardboard last year.

Water Conservation

Hydraflow started construction on bathroom remodels for the manufacturing floor. The new bathrooms will contain water-efficient faucets and facilities.

Energy Efficiency

Hydraflow's office lighting has been updated to LED lighting. Energy per light has been reduced from 108W to 20W. This will save approximately \$18K in electricity fees.

Health & Wellness

Hydraflow's latest wellness incorporated wearables to track our activity. Over 85 employees participated and walked almost 19 million steps in March.

Education

Thirteen employees are enrolled in the Pathways Program at the University of Redlands working towards a BS in Business.

Helping Our Community

Thirty-three Hydraflow employees participated in Love Fullerton, a day of service for our community. Participants volunteered at various programs throughout the city.
